SUMMARY

A dedicated and motivated B.Tech Computer Science and Engineering graduate with clean coding habits and solid foundations in React, Python, SQL, HTML, and CSS. Enthusiastic about engineering responsive frontends and automated systems. Eager to bring continuous learning and problem-solving abilities to an entry-level Software Developer role.

TECHNICAL SKILLS

- **Language:** Python, SQL, HTML5, CSS3, JavaScript
- **Frameworks & Tools:** React, MS Excel, Power BI (Learning), Git, GitHub, Arduino IDE, Blynk IoT
- **Databases:** MySQL, SQL Essentials

ACADEMIC & TECHNICAL PROJECTS

React Weather Application | *React, JavaScript, REST APIs, CSS3, GitHub*

- Built a responsive React weather application delivering real-time weather analytics and accurate location-based tracking.
- Integrated live third-party REST APIs with smart city-search optimization, custom error handling, and fluid loading states.
- Designed a dynamic, modern UI that intuitively changes background styles and themes matching current live weather conditions.
- Utilized Git and GitHub for structural version control, documentation, and clean open-source code hosting.

Inventory & Sales Management System | *Python, MySQL, MySQL Connector, Git & GitHub*

- Developed a console-based Inventory & Sales Management System using Python and MySQL.
- Implemented CRUD operations for adding, viewing, searching, updating, and deleting products.
- Developed stock management functionality with automatic inventory updates during sales and low-stock alerts.
- Integrated MySQL database using MySQL Connector and implemented SQL queries, JOIN operations, and sales reporting.
- Used Git and GitHub for version control and project documentation.

Mini Frontend Web Project | *HTML5, CSS3, UI Design*

- Developed a highly polished, responsive, and user-friendly web interface practicing core modern frontend development workflows.
- Structured clean web pages using semantic HTML5 tags and crafted beautiful custom layouts with flexible modern CSS3.
- Optimized layouts across multiple viewports for perfect mobile-first compatibility and crisp asset rendering.

Automatic Irrigation System using IoT | *Arduino IDE, IoT Sensors, Blynk IoT, Embedded C++*

- Engineered a fully automated smart irrigation device that continually maps soil moisture data points in real-time.
- Programmed logical threshold routines in Embedded C++ to safely engage water pumps, conserving critical resources.

- Configured custom live telemetry streams via the Blynk IoT cloud architecture for seamless end-user mobile tracking.

CERTIFICATIONS & TRAINING

- Online Summer Training: Programming with Python – Internshala
- Online Training: Web Development – NullClass
- Java Web Development Certification Course – HCL

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering Ashoka Institute of Technology and Management, Varanasi, Uttar Pradesh 6.63 CGPA	July 2025
Diploma in Electronics Engineering Chandauli Polytechnic, Chandauli, Uttar Pradesh 73.6%	July 2021
Intermediate (Class XII) A.S.V.M.I. College, Shahidgaon, Chandauli, Uttar Pradesh 57.8%	April 2018
High School (Class X) A.S.V.M.I. College, Shahidgaon, Chandauli, Uttar Pradesh 82.4%	May 2016

ADDITIONAL INFORMATION

- **Languages Known:** English, Hindi
